From the Director

Academic libraries, particularly those that support science and medicine, are immersed in an evolutionary and exciting time. On the horizon, national policies related to the management and sharing of research information and data will have a profound and potentially transformational effect on the scholarly information sharing ecosystem.

Pioneering mandates in several European countries have resulted in immediate access to publications stemming from publicly and privately funded research. In the U.S., the new National Institutes of Health Data Management and Sharing mandate, in addition to the White House Office of Science and Technology Policy memorandum that ensures free, immediate, and equitable access to federally funded research, both signal significant change for research dissemination practices in the coming years.

Locally, the Medical Center has grown tremendously. Yale School of Medicine and the Yale New Haven Health System’s shared vision of an academic health system presents exciting opportunities for the Medical Library. We’re continually working to simplify and standardize access to the research and evidence clinicians need to provide the highest standard of patient care.

Demand for the Medical Library’s research, data, and bioinformatics services is flourishing as well. During the past year alone medical librarians co-authored with research teams on a remarkable seventy-three systematic review and evidence synthesis papers, a forty-nine percent increase over the previous year.

New education programs such as the School of Public Health’s Online Executive Master of Public Health and the School of Nursing’s Psychiatric Mental Health Nurse Practitioner programs present an opportunity for the Medical Library to devise new services and support targeted towards distance learners.

It is an exciting and dynamic time for libraries indeed! As we navigate the future, all of us at the Cushing/Whitney Medical Library are eager to partner with you and support teaching, learning, research, and patient care across the Medical Center and beyond.

Sincerely,

John Gallagher
NEW ‘ASK A LIBRARIAN’ LINK IN EPIC

Clinical librarians from the Yale New Haven Health System (YNHHS) libraries’ collaborated to add an ‘Ask a Librarian’ link in Epic, under the ‘Library Resources’ tab. Launched in June 2022, the link provides another way to connect healthcare providers to their hospital’s clinical librarian. Whether it is assistance with a literature search or an inquiry about library resources, requesting library support at the point of need is now quicker and easier. Clinicians throughout YNHHS have already started placing requests.

‘Comprising Reeves Health Sciences Library, Greenwich Hospital Medical Library, Lawrence & Memorial Hospital Library, Westerly Hospital Library, and the Cushing/Whitney Medical Library

CARE SIGNATURE PATHWAYS

Care Signature pathways at Yale New Haven Hospital (YNHH) bring evidence, expert consensus, and clinical resources to clinicians at the point of care, promoting health equity across all sites of care. The Medical Library’s clinical librarians support this work by providing extensive literature reviews for the multi-disciplinary Clinical Consensus Group that builds each condition-focused pathway. These literature reviews are critical for delineating best practices and identifying areas with known controversies, variations, and care inequities.

“This partnership highlights the valuable contributions and expertise clinical librarians bring to interprofessional teams working to improve the safety and quality of patient care.”

– Nancy Kim M.D., Ph.D., Senior Medical Director, Care Signature, Yale New Haven Health System

LITERATURE SEARCHING PORTAL

The Medical Library unveiled a new ‘Evidence Synthesis & Literature Reviews’ web portal. The portal enables researchers to learn about the Medical Library’s search services and educate themselves on evidence synthesis reviews via self-guided learning modules. On the ‘Specialized Help’ page, users learn how medical librarians can provide support for general and comprehensive searching as consultants or embedded members of the research team.

The site also highlights the wraparound library support for research, including article retrieval by the Medical Library’s Cross-Departmental Team. Researchers can also find tutorials, guidelines and protocols, and learn about the multiple steps needed to complete a review.
Research Support

DATA MANAGEMENT

Last November, we welcomed Data Librarian for Health Sciences Kaitlin Throgmorton. Since her appointment, Kaitlin has offered several research data management seminars customized for Yale School of Medicine (YSM) programs and departments, such as the National Clinician Scholars Program, the Yale Interdisciplinary Prostate Program, and the Blumenfeld Lab.

In April, Associate Provost for Research Lisa D’Angelo invited Kaitlin to join an advisory group to help plan for the National Institutes of Health’s new Data Management and Sharing Policy which will become effective in January 2023. In this role, Kaitlin advises on best practices in data management and sharing, and meets with stakeholders across campus. Additionally, she developed a new course about writing data management plans to educate and support researchers.

BIBLIOMETRICS AND RESEARCH IMPACT

Yale University Library recently purchased an update to the Web of Science XML Dataset, which allows researchers to conduct custom bibliometric analyses. With over 82 million publication records in raw XML format, this large dataset requires significant processing to facilitate user access. Kaitlin Throgmorton, System and Application Specialist Justin DeMayo, and Head of Technology and Innovation Lei Wang conducted environmental scans and wrote custom code to process the dataset. This work allows Yale administrators and researchers to retrieve custom data in a format required for their bibliometric analyses.

The Medical Library also helped create customized bibliometric reports and visualization graphs. Examples include Kaitlin’s ‘scholar-in-focus’ network graphs, which illustrate research impact for early career medical professionals.

In addition, the Medical Library provided consultation and training services on impact evaluation and bibliometric analysis. We also partnered with researchers on bibliometric studies such as trends and patterns of publication in urology and radiology. The Medical Library is uniquely positioned to provide these services because we have an expert understanding of the data we license and can help researchers more precisely interpret metrics.

BIOINFORMATICS

Sofía Fertuzinhos joined the Medical Library’s Bioinformatics Support Hub in August 2021 as our second Research and Education Librarian for Bioinformatics. In this role, Sofía serves as a liaison to basic and clinical research departments and programs, and develops new Medical Library training opportunities, such as “Analysis of differential gene expression of bulk RNA-seq data using ‘DESeq2’ in RStudio”. Prior to

This bibliometric ‘scholar-in-focus’ graph centers the researcher, usually an early career scholar, in the middle of the graph (represented in green). Their accomplishments, such as published articles and other scholarly communications, fan out around them (represented in red). Collaborators on those accomplishments, such as co-authors, cluster at the edges (represented in blue).
joining the Medical Library, Sofia was a researcher and wet-lab scientist at YSM. Her perspective has been valuable in cultivating relationships with biomedical researchers looking to join the world of bioinformatics.

OPEN SCHOLARSHIP

Yale authors often pay expensive article processing charges (APCs) to publish research without barriers to access or paywalls. To support open access (OA) publishing, Yale University Library signed agreements with Cambridge University Press and Portland Press. These “read and publish” agreements waive APCs for Yale University and YNHH researchers publishing in fully open access and hybrid (open access and paywalled) journals. These deals make OA publishing opportunities more affordable, equitable, and available.

This spring, Research and Education Librarian for Public Health Kate Nyhan and Simbonis Librarian for Public Health Kayla Del Biondo conceptualized and began a research study exploring Yale School of Public Health (YSPH) faculty authors’ knowledge and viewpoints around open access and self-archiving (commonly referred to as “green open access”). Kayla and Associate Director Holly Grossetta Nardini are continuing to investigate author understanding of open access publishing and identifying barriers to self-archiving. This research will inform how librarians at Yale and beyond perform instruction and outreach to empower authors to make educated publishing decisions.

GRANTS

Alongside Principal Investigator Karen Wang and other Equity Research and Innovation Center (ERIC) staff, Holly Grossetta Nardini (Co-Investigator) and Research and Education Librarian Caitlin Meyer started work on a $450,000 three-year grant from the National Library of Medicine. The G08 grant program is for projects that seek to reduce health disparities through information resource projects. This project involves developing methods for locating, synthesizing, and curating publicly available health information on populations that are poorly described in the literature, using cardiovascular disease and people of Puerto Rican descent as the case study. One outcome will be a content analysis about how to locate data on multi-racial populations.
populations.

**COLLECTION DEVELOPMENT**

When we negotiate contracts with publishers, the Medical Library’s highly trained license review team works to protect the interests of our research community and their access to content. A recent example of this is when Collection Development and Scholarly Communication Librarian Lindsay Barnett renegotiated our contract for an evidence-based point-of-care resource. After reviewing the new license terms and conditions, Lindsay made key edits to ensure we retained the right to use the resource’s content for interlibrary loan. This right is granted by law, but it is one that the publisher has attempted to systematically strip from contracts. Thankfully our license review team is well-prepared for these long and sometimes challenging negotiations.

We continually assess the publishing environment and stay abreast of new titles and shifting research priorities at Yale.

After two years of financial uncertainty, we’ve been able to add new resources to our collection such as *Stahl Online*, *Genetics in Medicine*, and *The Lancet Gastroenterology & Hepatology*.

**NEW ACQUISITION**

The Historical Library expanded its holdings related to disability through the acquisition of the Robert Bogdan International Collection on Disability, Healthcare, and Body Modification. The collection includes photo postcards, photographs, and other ephemera dating from 1890-1969, which document indigenous healthcare practices and missionary work, often from a colonial viewpoint. Robert Bogdan’s pioneering work in the field of disability studies focuses on “disability” as a social, cultural, and political phenomenon.

Education Support

PUBLIC HEALTH EXPANSION
This year we expanded the Medical Library’s support for students, faculty, and staff at YSPH. Simbonis Librarian for Public Health Kayla Del Biondo joined the Academic Research and Education team, bringing expertise in information literacy and a passion for student success.

Having two specialized public health librarians has allowed the Medical Library to offer the growing YSPH community additional library services, including an improved public health presence on our website, more frequent office hours, and popular new training sessions, such as “Before You Write the Review: How to Effectively Read and Annotate Scholarly Literature.” YSPH’s student cohorts and the new Executive Master of Public Health (MPH) program also benefit from Kayla’s additional support.

ASSESSING SUCCESS AT YSN
Research and Education Librarian for Nursing Janene Batten conducted a survey of Yale School of Nursing (YSN) faculty to gauge their awareness of library services and satisfaction with their librarian. Janene conceived the project and worked with Yale University Library’s Assessment and User Experience Research team to develop survey and interview questions. The resulting report confirmed that faculty were pleased with their librarian interactions and wanted to learn more about library services. Janene used the data to develop a series of orientations about the library for new YSN faculty.

CURRICULAR COLLABORATION
Building on a successful paper at YSM’s 2021 Medical Education Day, Research and Education Librarian Caitlin Meyer and Dr. Rosana Gonzalez-Colaso presented their innovative physician associate longitudinal research skills curricula to a national audience at the 2021 Physician Assistant Education Association meeting. The eighty-minute workshop, the only content in the program presented by a librarian, led participants through curriculum design and implementation as well as how to build interprofessional relationships between faculty and librarians.

“I really appreciate the abundant resources from the Yale Medical Library. We have knowledgeable and approachable librarians, various workshops that cover different topics, helpful statistical consultants, etc. All these have assisted my research in numerous ways.”

– Xiaoting Shi, Ph.D. ’24 (Environmental Health Sciences)
TEACHING AND CONSULTATIONS

Throughout the year, medical librarians orient and educate faculty, staff, and trainees across the medical campus about library services and support. These sessions are tailored to each group’s unique needs, both in terms of the type of information presented and where or how it is delivered. Sessions range from thirty-minute Zoom overviews to multi-week didactic lessons throughout the medical curriculum. Perhaps most importantly, these sessions establish medical librarians as partners in research, clinical, and educational endeavors, and cultivate relationships that will last throughout each researcher’s Yale career.

Our goal is for researchers to develop the knowledge and skills they need to do their work effectively, whether that is searching biomedical databases, studying historical manuscripts, preparing for grants, or managing their research data.

WORKSHOPS AND TRAINING

Medical librarians added a variety of highly requested training to the instruction calendar, including “Getting Started with Python: An Introduction to Programming” and “Managing Citations and Bibliographies with EndNote 20.” Also popular this year were the Bioinformatics Support Hub’s peer-to-peer teaching series, which features postdoctoral researchers at Yale, and a collaborative omics training with Dr. Mariateresa Mazzetto from the Genetics Department. Additionally, medical librarians partnered with faculty, researchers, librarians from other units, software vendors, and the Poorvu Center for Teaching and Learning to expand educational offerings for the medical campus community.

1,745 consultations and embedded instruction sessions

2,627 faculty, staff, and trainees reached

400+ library workshops and training sessions offered virtually and in-person

“This was great. It was a perfect pace for an introduction to Zotero and Courtney was incredibly informative and went above and beyond to help me find answers!”

– Workshop attendee

“Excellent amount of information, and all we needed at an important time when we are about to dive into a research-intensive summer.”

– Summer to Advance Research Training at Yale School of Medicine student

“Kaitlin is an excellent teacher. She has a logical approach towards beginning with Python that is easily digestible and retainable for a beginner. She was very patient and answered all of our questions thoroughly.”

– Workshop attendee
Community Support

**MUTUAL AID INITIATIVES**

Medical Library staff collaborated with members of the community both within and outside of Yale to help raise supplies, awareness, and funds in support of multiple causes. Library Services Assistant Dorota Peglow served a vital role in connecting the Medical Library with the Franciscan Bridge of Help to collect and deliver desperately needed medical supplies and monetary aid to hospitals in Lviv, Ukraine. A large donation box was placed near the Medical Library’s circulation desk in early March 2022 and in just two days, the Yale community had filled three boxes with donated medical and surgical supplies. Two student workers helped translate medication labels into both Ukrainian and Russian and pack boxes.

Additionally, our staff members partnered with IRIS (Integrated Refugee Immigrant Service), a non-profit agency based in New Haven, to gather fifteen boxes of materials in aid of Afghan refugees. Other collaborations included teaming up with Yale’s Working Women’s Network to collect diapers and wipes for their annual diaper drive; and Head of Access and Delivery Services Melanie Norton’s collaboration with the Arts Library’s Shawana Snell to obtain $2,000 for the New Haven Free Public Library to purchase books for underserved populations.

**MENTAL HEALTH SUPPORT**

In March 2022, a group of Medical Library staff attended an eight-hour training session to be certified as Mental Health First Aiders. Asha Shipman, Director of Hindu Life and Certified Mental Health First Aid Trainer, educated participants to connect those in crisis to appropriate professional, peer, social, and self-help resources. Participants grew together as a team while learning how to support our library patrons in a unique way.

“I am glad my language skills were able to come in handy here. This war feels deeply personal to me and while it feels like nothing I can do could be enough, I hope that this helps at least some.”

– Anna Baker YC ’22, Medical Library student worker
Library Services Assistant Vermetha Polite coordinates frontline services at the Information Desk, organizes the Medical Library’s education calendar, assists with room reservations, handles and refers a wide range of questions, and provides assistance requesting interlibrary loan material and related inquiries.

*Photo: Kelly Perry*

Chris Zollo is the Historical Library Assistant. He oversees the Historical Library reading room, runs the Medical Library’s Instagram account, and assists with exhibits, preservation, reference, digitization, cataloging, acquisitions, and more.

*Photo: Kelly Perry*

**PRIVACY BOOTH**

The Medical Library recently installed a Zenbooth in the Morse Reading Room. This free-standing modular privacy booth offers a soundproof space for visitors to take phone calls, have meetings, or focus on tasks in complete silence. The booth is equipped with an adjustable desk, power outlets, and dimmable lights. Additionally, a high-powered fan cycles fresh air into the booth every minute.

Exhibitions

LAUNCHED AUGUST 2021
Medical Astrology: Science, Art, and Influence in Early–Modern Europe (online)
This exhibition explores the visual history of medical astrology in Europe between the fifteenth and seventeenth centuries. Nearly 200 images from the Historical Library’s collection are included.

AUGUST 2021–JANUARY 2022
Environment and Climate Change Posters

FEBRUARY 2022–APRIL 2022
Innovation & Evolution in Hip Replacement Surgery: Highlights from the Keggi–Rubin Hip Implant Collection at Yale University
This exhibition explored the evolution of hip replacement surgery through historic implants selected from the new Keggi–Rubin Hip Implant Collection at Yale University. An online version of this exhibition features additional objects from the collection.

MARCH 2022–MAY 2022
Scenes of City Life
This exhibition featured prints depicting life in the Great Depression and its aftermath, presented in the works of immigrants and others for the Federal Art Project and the Works Progress Administration.

APRIL 2022–AUGUST 2022
100 Years of Pediatrics at Yale
This exhibition featured material documenting some of the department’s initiatives, firsts, faculty, residents, fellows, research, and outreach to the community.

MAY 2022–DECEMBER 2022
Highlights from the Yale Child Study Center Reference Collection

JUNE 2022–DECEMBER 2022
Activism through Historical Posters

MAJOR GIFTS
Riesman Gift
Approximately 230 rare books and manuscripts were gifted to the Historical Library from the libraries of David Riesman, M.D. and John P. Riesman, M.D. The books’ content covers a wide variety of topics and time periods, with the earliest texts dating from the sixteenth century. Notable items include the works of highly influential medical authors such as Florence Nightingale, Herman Boerhaave, and Thomas Willis. Other examples include a 1774 copy of William Buchan’s Domestic Medicine as well as “Tom Telescope’s” The Newtonian system of philosophy… for the use of young ladies and gentlemen, (1803), an introductory text to Newton’s scientific principles.

Lyme Disease Activism
The Historical Library received the papers of Lyme disease activist Polly Murray as a gift from her family. Murray lived in Lyme, Conn. and alerted the Connecticut State Department of Health and Yale – particularly doctors Allen Steere and Stephen Malawista – to the outbreak of symptoms in the Lyme community. Murray’s firsthand experience with the disease was integral to the early investigation, and her papers include correspondence, an original handwritten list of those who had been affected and their symptoms, and other materials.

Project Archivist for Burget papers
In November 2021, the Historical Library welcomed Laura Juliano as a Term Project Archivist processing the Gary Burget papers, a 267 linear feet collection of plastic surgery records and materials. With the help of student assistants, by June 2022 Laura completed organizing and rehousing more than half of the collection in archival enclosures to ensure materials are preserved for future use. The position was funded through a $100,000 gift from Dean E. Burget, M.D., and Gabriella M. Burget, in memory of Dr. Gary Burget (1941–2017).

Student Healthcare Activism
The Historical Library expanded its collections with a gift documenting student healthcare activism starting in the 1960s. Michael Charney, M.D. ’72, donated his papers related to student activism during his time at Yale, as well as material from
other activist groups, such as the Black Panther Party and The Medical Committee for Human Rights. The Charney Collection provides insight into healthcare activism at Yale and in other parts of the country, highlighting links between the various student, political, and community activist groups.

**Beaumont Medical Club Papers**
The ysm Beaumont Medical Club formally transferred its papers to the Historical Library, helping to preserve its 100–year legacy and open the collection to researchers. The Beaumont Medical Club was founded in 1920 by a group of ysm physicians and faculty members, who named the club for physician William Beaumont, a Connecticut resident and an early pioneer in physiology. The club was organized to promote the study of the history of medicine and to celebrate the contributions of physicians and medical scientists to the welfare of mankind.

**The Wilfrid Rall Computational Neuroscience Research Collection**
The Historical Library received the Wilfrid Rall Computational Neuroscience Research Collection, a gift of Gordon Shepherd, M.D., D.Phil. (1933–2022), and the family of Wilfrid Rall, Ph.D. (1922–2018). Dr. Rall was a neuroscientist whose work focused on the electrical properties of neurons and the functions of neuronal dendrites, and helped found the discipline of computational neuroscience. The collection documents his research from 1963–1971, particularly his collaborative work with Dr. Shepherd. Research notebooks, correspondence, and reprints of Dr. Rall’s publications are included in the archive. The notebooks were fully digitized and are available online.

**Waltham Hospital Medical Records**
The Historical Library received a new gift of patient records from Boston’s Waltham Hospital (which closed in 2003) dating from
1889 to 1897. Within seven bound volumes are notes, operative reports, pathology reports, and medication records written by attending physicians. The volumes provide a snapshot of patient care, disease, and medicine in late nineteenth-century Massachusetts. The collection is a generous gift of Alan M. Engler, M.D., YC ’76.

Picturing Public Health and Medicine
Like audiences today, nineteenth-century readers of popular magazines and newspapers learned about public health initiatives and medical discoveries through articles and imagery. The Historical Library team digitized over 600 images from The Bert Hansen Collection of Medicine and Public Health in Popular Graphic Art, such as chromolithographs and wood engravings from nineteenth-century magazines. Notable titles include Harper’s Weekly, Frank Leslie’s Illustrated Newspaper, Puck, and Scientific American on topics including cholera, diphtheria, tuberculosis, vaccinations, rabies, hospitals, unsafe foodstuffs, and public sanitation. The effort to digitize these images and make them freely available worldwide was generously funded by the Arcadia Fund.

Additionally, to celebrate this year’s National Public Health week, Kayla Del Biondo and Kate Nyhan invited Bert Hansen, Professor Emeritus of History at Baruch College, to present highlights from his collection. The lecture is available to view here: https://vimeo.com/702172511 (closed captioning available)

Dr. Eric Berger, Assistant Professor (Clinical Psychiatry)  
Dr. Merle Waxman, Associate Dean, Director, Office for Women in Medicine and Ombudsperson  
Family of Dr. Gordan Shepherd  
Dr. Joseph Elman, Assistant Clinical Professor (Ophthalmology and Visual Science)  
Dr. Richard A. Matthay, Professor Emeritus, Senior Research Scientist (Pulmonary Medicine)  
Dr. Eiji Yanagisawa, Professor (Otolaryngology)

**MEDICAL LIBRARY ASSOCIATES**

Established in 1948, the Medical Library Associates have supported the Medical Library for over seventy years, helping enable its world-class services to the faculty, staff, and students of the Yale Medical Center, today and for generations to come.

Through the generosity of our Associates, we are able to provides essential support for biomedical education and research. Past examples of what the Medical Library Associates have funded include creating a digital imaging center, purchasing rare books and manuscripts (such as the fourteenth-century Paneth Codex), digitizing collections, and purchasing new exhibition cases for the central rotunda.

Each year, the Associates host a lecture in the Historical Library. Past speakers have included Nobel laureates, writers, professors, and Surgeons General who have lectured on a wide variety of topics relating to medicine. For the 2022 Annual Lecture of the Medical Library Associates, the Associates welcomed Yale School of Public Health Professor of Epidemiology (Microbial Diseases) Serap Aksoy, Ph.D. as the speaker. Dr. Aksoy presented on the topic “Advancing global public health: building bridges across disciplines and advocating for evidence-based health policies” and reflected on her appreciation of libraries.

To make a gift or learn more about becoming a Medical Library Associate, please visit our website. All gifts are tax-deductible.
Staff Highlights

LONG SERVICE AWARDS
15 years – Pamela Gibson, Robert Hughes
10 years – Melissa Grafe
5 years – Alexandria Brackett

NEW STAFF
This year we welcomed eight new staff members in four departments.

Kayla Del Biondo, Simbonis Librarian for Public Health
Justin DeMayo, System and Application Specialist
Sofia Fertuzinhos, Research and Education Librarian for Bioinformatics
Laura Juliano, Term Project Archivist
Megan Nance, Access Services Librarian
Kaitlin Throgmorton, Data Librarian for the Health Sciences
Kyra Walker, Library Services Assistant 4
Akram York, Distributed Support Provider

PROMOTIONS
Promoted to Librarian III – Alexandria Brackett, Alyssa Grimshaw, Caitlin Meyer
Promoted to Librarian V – Melissa Grafe, Lei Wang

RECOGNITION
Head of Access and Delivery Services Melanie Norton was recognized for her outstanding leadership of the DiversAbility at Yale (DAY) affinity group. Throughout her career Melanie has been passionate about and responsive to the needs of individuals impacted by disability, and in particular to the challenges students with disabilities encounter when trying to use public spaces and academic libraries.

As the co-chair of DAY from 2019 to 2021, Melanie championed the causes of faculty, staff, and students with disabilities (either visible or invisible) to improve their sense of belonging at Yale.
RETIREMENTS

Three Medical Library staff members retired this year after a collective 141 years of service. Each person made their mark on the Medical Library in various ways and will be missed.

Library Services Assistant Jeannette Ponzio joined the Medical Library in 1965 as a library page. Later, she became acting Head of Circulation before moving to Technical Services where she worked in acquisitions and cataloging. Jeannette was involved in the World Health Organization’s HINARI initiative, a project enabling underserved nations to gain access to journals and electronic books. Jeannette was instrumental in contributing to the HINARI initiative and thus improving world health.

For over five decades, Rare Book Cataloger Thomas Falco helped shape the Historical Library’s vast collections. From assisting researchers to cataloging rare books to ensuring the timely processing of gifts and acquisitions, Tom’s work ensured the continued development of the Historical Library’s collection and his attention to detail improved the discoverability of historical resources for generations to come.

Over the years Library Services Assistant Alla Mashkautsan provided crucial support to the Access and Delivery Services department including customer service, institutional memory, and resource processing. Her efforts supported the work of thousands of students, faculty, and staff.

PUBLICATIONS

The evidence synthesis and comprehensive searching projects would not be possible without a team of dedicated staff who facilitate article retrieval and citation management: Veretha Polite, Mary Hughes, Vasean Daniels, Dorota Peglow, Pamela Gibson, Aletia Garvey, and Lisa Sanders.
