Accessing UpToDate from Epic

You can now access UpToDate (as well as Access Medicine and Micromedex) from within the Epic Application. For UpToDate, CMEs can be accrued each time you access the site from Epic by associating your Epic ID with an account in UpToDate. This can be done by either logging in with your existing UpToDate account or Registering with UpToDate the first time you access the site from within Epic.

To Access and Register

From within Epic click on the Library Services action button on the top toolbar:

A pulldown menu (pictured to the right) will open where you click on the desired resource you wish to open, such as UpToDate:

Upon first access of UpToDate you will be asked to register if you want to Earn CME with searches:
If you already have an account with UpToDate, enter it in the Log in box on the left (A) in the screenshot above.

If you do not have an UpToDate account (have not registered before) then you should create an account in the Register Box (B).

When Registering enter all of the information required and Submit the Registration

**Accept the License Agreement:**

After registering, each time you access UpToDate from Epic, the application will know who you are and you will automatically accrue CME to your associated account.

To view your Account or CME balance, click on the appropriate “My Account” tab and use the UpToDate username and password you created to access. From here you can access, request, and also print out CME certificates as needed.

The other available resources that can be launched from Epic, such as Access Medicine and Micromedex do not currently offer CMEs.
